GUANGZHOU FASHION COURT PLASTIC CO.,LTD

6 SERIES / 34 CATEGORIES / 319 REFERENCE SETS

2026 / ENGLISH EDITION V4

HOW TO SELECT

A guide to tube and closure selection

01 Browse by closure

Browse 6 series and 34 categories. Click a contents entry to jump to its product pages. Each reference set shows two source component photographs for comparison.

02 Understand the references

FC-R numbers are catalogue selection references, not mould numbers. A and B retain the original source part references for checking; they are not confirmed Fashion Court mould references.

03 Images and specifications

Series banners show our ivory and champagne-gold brand design with the Fashion Court logo. Component photographs retain their original colours for structural comparison. Reference capacities require filling and compatibility verification.

04 Confirm your selection

This edition includes publicly available competitor product references. Availability, moulds, threads, seals and tube-cap compatibility require confirmation. For enquiries, quote the FC-R reference, target capacity, formula type and quantity.
